

With 3400 people on the housing waiting list this policy should be revised, there should not be any market housing built on this proposed sites, as it stands the market houses will attract more families to move in to an already over crowded area and create more mental depression and lack of well-being for the people of Hastings. Real affordable housing does not exist at this time, we need to introduce a new system, that is to say build homes and sell at cost with controls on any resale, some could be rented. To purchase at cost would be cheaper than renting, and occupants usually look after their own better than renting.

May I suggest a referendum on the housing crises in Hastings.
