

Rep no 340 Heath-watch/Link.

MATER 2, Wednesday 6th February.

The case here is that while the council mention the importance of the link road, I believe this road is of more interest to have the opportunity to build the houses for Hastings and Rother to fulfill the required numbers set by the South East Plan.

By building the houses we will then just fill up another road with more congestion along the Ridge.

Is there a plan to estimate the cost of the extra road/rail that will be needed to address the transport problem, then what will be the Government / developers contribution?

This should be answer before any houses are built.

Tram ways should be considered and parking facilities.

The fact is we are not just looking at a Hastings Plan ,the districts of Rother, Wealden ,Lewes and Eastbourne are all building houses, there docent seem to be a joined up plan.

Laurence Keeley.
