

Information Correction Email

Dear Lynette,

Please could you forward this apology to the Inspector and Mr Phillips.

At yesterday's hearings I said that Gensing was the second most densely populated ward in East Sussex. I later thought that I'd got this wrong, so I checked and I was wrong. Gensing actually ranks 5th in East Sussex and 4th in the Borough. I didn't have the information in front of me and perhaps I confused it with Gensing being the second most deprived ward in East Sussex after Central St Leonards (East Sussex JSNA Index of Multiple Deprivation 2010 ward rankings).

The five Most Densely Populated Wards in East Sussex are (in persons per hectare based on 2011 Census data - East Sussex in Figures website, ESCC):

1 Central St Leonards	105.4
2 Tressell	80.0
3 Devonshire (Eastbourne)	79.3
4 Castle	70.8
5 Gensing	67.1

My sincerest apologies to the Inspector, Mr Phillips and all concerned.

Regards,

Teresa Jarvis
