Indices of multiple deprivation	The Index of Multiple Deprivation provides an insight into the social characteristics of the Borough. It provides an overall measure of how deprived a community is by scoring a wide range of issues, including employment, income, health, education, housing and crime. These 6 areas have 32 separate indicators, which together make up the overall indices of deprivation.	Hastings is in the top 10% of most deprived Local Authority areas in England- and ranks 29 on the average ward scores, where 1=most deprived and 354 = least deprived district in England. Comparative data Eastbourne ranked 88 Rother 163		C S target 1 Halve the number of neighbourhoods in the 10% most deprived nationally 12 – 2005 10 – 2008 6 - 2013		IMD 2007  <a href="http://www.communities.gov.uk/communities/neighbourhoodrenewal/deprivation/deprivation07/">http://www.communities.gov.uk/communities/neighbourhoodrenewal/deprivation/deprivation07/</a>
Location of most deprived Super Output Areas	The Index also measures deprivation for small areas with a population of about 1500 people – these are known as Super Output Areas (SOA) and there are 53 such areas in Hastings and St Leonards, and 32,482 nationally.	37.7% of SOAs in Hastings fall within the most deprived 20% of SOAs in England – this is the highest proportion of any Local Authority in the South East. Approximately 22% of the town's population live in an SOA, which are in the top 10% most deprived nationally.		CS target 1 Narrow the gap – halve the number of neighbourhoods in the 10% most deprived nationally. (A neighbourhood is defined as a Super Output Area.)
